PROJECTS

PROJECT NAME	DESCRIPTION	LANGUAGES
Covid-19 Monitoring system using social distancing and face mask detection on surveillance video datasets (BCA main-Project)	During COVID-19 pandemic time, we know that there was a compulsory to wear mask and to maintain social distance. This system checks whether the public have wear the mask and had maintain the social distance using video datasets, if the person is a registered user of the system and if he had not wear the mask then he will receive a message with date and time. For social distancing just a concept of webcam is made which checks whether a 2 meter social distance is maintained or not.	Python(Flask), HTML, MySQL
	This is a web based application which is	

Insurance Management System (BCA mini-Project)	developed for tracking the details of the insurance policy, customer details and company details. This system deals with all types of insurance like health, life etc. The registered user can take the insurance policy they need, and this system also provides online premium payment for their insurance policy's.	HTML, PHP, MySQL
